

MENTAL HEALTH & ADDICTIONS OUTPATIENT CLINIC REFERRAL

Instructions and Information

Please review the following information with your patient:

We have transitioned to a Stepped Care Model for Adult Mood & Anxiety referrals. Services will be offered based on appropriateness, availability, and patient preference, and may include psychiatric consultation and brief treatment, where appropriate. Please note: Not all patients will be seen by a psychiatrist, and emphasis will be on providing episodes of care. Once treatment is completed the patient will be discharged back to the referring source.

The Mental Health & Addictions Clinic does not offer psychiatric assessments for legal, insurance, custody, CAS, WSIB or forensic reasons.

**This form is not for individuals experiencing crisis or in need of urgent care.
Patients experiencing a mental health or addiction emergency
should be directed to the nearest emergency department.**

Referral Process:

Please ensure your patient is aware of this referral. Intake staff will make **two** attempts to reach the patient and leave two voice mail messages. The number will appear as Humber River Hospital. If we are unable to reach the patient, the referral source will be notified by fax and the referral form will be inactivated.

All referrals are reviewed by an Intake Clinician. The referral will be forwarded directly to the appropriate service, or a telephone screening will be scheduled with the patient to gather more information and determine the next step. Patients are welcome to contact us directly at 416-242-1000 ext. 43170 to discuss their referral at any time.

How to submit a referral:

- Review the above information with your patient to ensure expectations are aligned
- Fax the completed form to 416-242-1024
- Fax each referral form individually
- To help us provide the best care for your patient, please include all relevant documents including previous psychiatric consultations or discharge summaries, psychological reports, medication sheets, medical reports, lab and test results
