

Help protect your baby from RSV with **Beyfortus**[®]

Beyfortus[®] can be given to your baby in their **first respiratory syncytial virus (RSV) season.**

It may also be given to children <2 years of age who are vulnerable to severe RSV disease in their second RSV season.

Beyfortus[®] may be publicly funded in your province or territory (with criteria). Speak to your doctor to see if Beyfortus[®] is covered for your baby.

 **Beyfortus**[®]
(nirsevimab)

Ask your healthcare professional if Beyfortus[®] is right for your child. 100% protection cannot be guaranteed. Uncommon side effects (may affect up to 1 in 100 children) can include rash, injection site reaction and fever. Full product information can be found on Sanofi.ca. To report an adverse event, please call 1-866-234-2345.

You can also find the full product monograph, which is prepared for healthcare professionals and includes the complete Patient Medication Information, by visiting the website: <https://www.sanofi.com/assets/countries/canada/docs/products/vaccines/beyfortus-en.pdf> or by calling 1-800-265-7927.

Talk to your child's healthcare provider today about RSV and how you can help protect your baby
